

X-FILL™

Paper Void Fill System

21%

**faster than nearest
equivalent on
the market !**

Paper void fill is a fast, cost-effective and environmentally friendly way to secure consignments within oversized cartons.

X-FILL™

Paper Void Fill System

Using patented new-generation technology, the X-FILL outperforms all comparable products.

- > Anti-jamming paper feed and "load and go" paper packs almost eliminate downtime.
- > At 1.7 metres per second it is 21 % more productive than the nearest equivalent machine on the market.
- > Its modular construction has been designed so that it can be assembled and ready to run in less than five minutes.
- > Mounted on a height-adjustable stand with lockable castors, its compact design and small footprint mean it can be easily deployed to any location requiring instant, on-demand paper void fill.
- > Output is further increased by foot pedal operation and auto cutting, which cuts the paper stream to the required length rather than the operator having to tear it.

Simple to use digital control panel offers functional flexibility

Quick and easy paper feed

The X-FILL head can be tilted to dispense void fill where it is needed

Lockable castors for extra stability

Remote foot pedal operation

Specifications

- | | |
|----------------|----------------------------------|
| > Output type | pre-set/continuous void fill |
| > Output rate | > 1.7m/s |
| > Paper stock | XF-P001 (single-ply 50gsm Kraft) |
| | XF-P002 (single-ply 70gsm Kraft) |
| > Power supply | 230v 50Hz |
| > Power usage | 100W |
| > Weight | 26kg (52kg inc. stand) |

X-FILL dispensed paper void fill provides the ideal protective packing ballast to secure consignments within oversized cartons.
